

If Marxism continues to be disseminated, the human being will end up totally losing his five senses which are in the process of degeneration.

It is already proven by observation and experience that the absence of spiritual values produces degeneration.

The painting of today, music, sculpture, drama, etc., are nothing but the product of degeneration.

The initiates of other times, the sacred female dancers, the true artists of the great times no longer appear on the stage. Now, only sick automatons, degenerated singers, rebels without a cause, etc. appear on the stage.

Ultramodern theaters are the antithesis of the sacred theaters of the great mysteries of Egypt, Greece, India, etc.

The art of these times is tenebrous, it is the antithesis of Light and modern artists are tenebrous.

Surrealistic and Marxist painting, ultramodern sculpture, Afro-cuban music and the modern female dancers, are the result of human degeneration.

The young men and women of the new generations receive by means of the three cerebrums data which is sufficient to convert them into swindlers, thieves, assassins, bandits, homosexuals, prostitutes, etc.

No one does anything to put an end to this bad art and everything marches towards a final catastrophe due to the lack of a Revolution of the Dialectic.

### **MATERIALISTIC SCIENCE**

On a certain occasion, a materialistic atheist, an enemy of the living Eternal God, and a religious man, argued. They argued about the subject of: Which was first, the egg or the chicken? One answered: It was the egg; of course, it was the egg. And who laid the egg? Well, the chicken. So the other one said that it was the chicken. And where did the chicken come from? Well, from the egg. This is a story that never ends.

Finally, a little impatient, the religious man said: "Could you make an egg the way God did it?" The materialist answered: "Yes, I can!" "Do it!", exclaimed the religious man; and the materialist made an egg which was identical to that of a chicken: with its yoke, albumen and shell. Seeing this, the religious man said: "Since you made a marvellous egg, it will produce a chicken. Let us place the egg in an incubator in order for it to be born". "Agreed!", said the materialist and they placed the egg in the incubator, but the chicken never came out...

The sage Mr. Alfonso Herrera, author of *Plasmogeny*, managed to create a cell, but a dead cell which never had life.

Grafts are made, a branch from another plant is implanted into another, supposedly to improve the fruits. The know-it-ails thus want to correct Nature. What they do is an absurdity. Grafts do not carry the same natural living force of the *Megalocosm*. Ingested adulterated fruits come to harm the human body from the energetic point of view.

However, scientists feel satisfied with their experiments. They do not understand that each tree captures energy, transforms and retransmits it to the fruits. Upon altering the tree, the energies of the *Megalocosm* are altered and already that fruit is not the same; it is the product of an adultery and it harms organisms.

However, materialistic scientists believe that they know, when really and truly they do not know. They do not only ignore, but what is worse, they ignore that they ignore.

Artificial inseminations are made, the famous spermatozoon, the vivifying cells of an organism are extracted, and already because of that, scientists think that they are creating life. They do not realize that they are only utilizing what nature has already made.

Let us put on the laboratory table the chemical elements which are needed to fabricate a spermatozoon and an ovum. Let us tell the scientists to make the ovum and the spermatozoon. Would they do it? I say that they would. But, would they have life? Could perhaps a living child come out of it? Never, ever, because they do not know how to create life. Therefore, with what proofs do they deny the superior or creative intelligences? If they are not even capable of creating the seed of a tree, a seed that can germinate?

What is the basis that materialists have to deny the creative intelligences? Why do they pronounce themselves against the Eternal?

Has any materialistic scientist been able to create life? When?

To play with what Nature has already made is something easy, but to create life is different. No scientist can do it...

Are they creating life when they divide an amoeba into two, separate its parts on a laboratory table, unite it with another piece of micro-organism and they say: Eureka! Eureka! Eureka! But they are not capable of creating an amoeba. Where is the science of these materialistic gentlemen? When have they demonstrated that they can replace the Divinity? The reality of facts is that they not only ignore, but what is worse, they ignore that they ignore. Facts are what count and until now they have not demonstrated it.

They say that man comes from the monkey. They come out with the theory of the cynocephalus without a tail, the monkey without a tail and the arboreal men, children of the Noeptizoids, etc. But, which would then be the missing link? On what day have they

found a monkey that is capable of speaking, gifted with speech? It has not appeared until now. These materialistic gentlemen are ridiculous; they are presenting us with suppositions and not facts.

Let us measure the volume of the cerebrum of the best of the monkeys and let us compare it with the cerebrum of a backward man that may be found, for example, in the tribes of Australia. It is obvious that that monkey would not reach the speaking capacity.

Are materialists, therefore not refuting the theories of Darwin himself and his followers? Does man come from the monkey? On what basis do they sustain it? How do they demonstrate it? Until when are we going to wait for the supposed missing link? We want to see that species of monkey speaking like people. It has not appeared, therefore, it is a supposition of a nonsense that has no reality.

Why do they speak of things that they do not know? Why so many cheap utopias?

Simply because they have their consciousness asleep, because they have never become interested in carrying out a psychological revolution within themselves and because they lack the practice of sexual super-dynamics. The crude reality of facts is that they are hypnotized.

Whoever does not practice the teachings of the Revolution of the Dialectic will fall into the same errors of the materialistic scientists.

Materialistic scientists continuously come out with many theories. By way of example we will mention that theory of the Selection of the Species: an insignificant mollusk develops and from it come out other living species through the process of selection until arriving at man. Can they demonstrate this theory? Obviously not!

We do not deny that in each species certain selective processes do exist. There are birds, for example, that migrate in specific times; one is amazed to see them all gathered, how strange they become; then, they pick up flight to cross the ocean and on the way, they die; only the strongest surviving the struggle. Those that survive the struggle transmit their characteristics to their descendants. This is how the selective law works.

There are species that incessantly struggle against marine monsters and on the basis of so much struggle, they result being strong and transmit their characteristics to their descendants.

There are beasts that on the basis of so much struggle become stronger and stronger each time, transmitting their psychological characteristics to their descendants. Never has natural selection been able to present to us a new species upon the stage of existence. Nonetheless, many are those who have given selection the characteristics of a Creator.

Much has also been said about the *protoplasm*. From the protoplasm which is submerged in the salty sea since millions of years ago, from that protoplasm it is said that universal life came.

Protist materialists make their ignorant followers believe, like themselves, that the psychological development of the intellectual animal, mistakenly called man, comes from the molecular development of the protoplasm and that it marches parallel with the processes of the same.

Protists want the consciousness, or however they may want to call it, to be the result of the evolution of the protoplasm throughout the centuries. This is how Protists, those who believe that they are gifted with knowledge, believe.

Haeckel's atomic Moneron, that atom that is submerged there in the aqueous abyss from which a life surged forth, comes to my memory. This is how Haeckel and his followers think

*Something complex that has not had to undergo different cosmic universal processes has not been organized.*

The reality is that scientists neither know anything about Life nor Death, nor about where we come from nor where we are going, much less what the objective of existence is. Why? Simply because they have their consciousness asleep, because they have not done the interior Revolution of the Dialectic, because they are at the level of massive, collective hypnosis due to the lack of Integral Revolution that we teach in this Work.

Materialistic science marches on the path of error; it knows nothing about the origin of man and much less about his inner psychology.

We do not deny that the law of natural selection has existed, but it has not created anything new. We do not deny that the species vary throughout time, but the variability factors only go into action after the original prototypes have crystallized in the physical world.

The original prototypes of any living species previously develops in psychological space, in the superior dimensions of Nature, in the superior dimensions that materialistic scientists deny because they do not perceive them, and they do not perceive them because they are psychologically hypnotized.

If they were to first come out of the state of hypnosis and then talked, their concepts would be different, but they sleep due to the lack of mental and sexual dynamics.

If someone wants to know about the origin of the human being, he has to observe Ontogeny. Ontogeny is a recapitulation of *Phylogeny*.

What is Ontogeny within Anthropology? It is the process of development of the fetus within the maternal womb. If we observe the processes of gestation of a mother, we can evince that Ontogeny is a recapitulation of Phylogeny, which, in turn, is a state of evolution and transformation through which the human race has undergone throughout the centuries.

Ontogeny recapitulates these states within the maternal womb. An Ontogenic analysis would lead us to the logical conclusion that the human species and the other animal species have resemblance in their origin and come from psychological space

But that matter of natural selection, of the different variants or factors that produce variation in the human race, only go into action after the species, whichever they may be, have physically crystallized. Before physical crystallization, evolving psychological processes exist within the living bosom of Nature, which are unknown to Haeckel and his followers, because, in reality, they know nothing about the origin of the human being.

How is it possible that materialistic scientists say that certain variations exist in the different types of living species? Whether it be by accident or in a spontaneous manner, is it perhaps not a contradiction?

Is it not they themselves who say that this Universe is the result of force, matter and necessity? How is it that they contradict themselves and then talk to us about spontaneous variants in a universe of force and necessity. Is that possible?

A universe of force, matter and necessity does not admit spontaneous or accidental variations. Those variations in the species exist due to something which they themselves do not know. Materialistic science does not only ignore, but what is worse, it ignores that it ignores.

*Psychoanalytical Gnostic Anthropology* delves profoundly into the past. This human race which nowadays populates the face of the Earth is nothing but a race of intellectual animals mistakenly called men. You can become offended if you want, but before this race of intellectual animals existed, Lemurian, Hyperborean and Polar men existed. Intellectual animals are derived from Atlantis, they were born in Atlantis. The real men of Lemuria, in their last days, withdrew from the world scenery. They left their organisms to the superior elements of the animal kingdoms.

The race of intellectual animals was preceded by the men who existed in Lemuria, in the Hyperborean continent and in the northern polar cap which in that era was situated in the equatorial zone. On what does *Psychoanalytical Gnostic Anthropology* base itself to affirm this? Why does it say this? It bases itself not only on all the traditions that come in the books of Ancient E of the land of the Incas, of the land of the Mayas, from Greece, India, Persia, Tibet, etc., but also on the direct investigations of those who have succeeded in awakening consciousness through a psychological revolution.

We are delivering through this Work all the systems which are needed to awaken consciousness, and when you awaken, you will be able to investigate and verify for yourselves what I affirm in an emphatic manner. But it is necessary to awaken in order to touch, see, hear, feel and not be a victim of the theories of a Haeckel, Darwin, Huxley and his followers.

Three races of men existed, but how could you know it when your consciousness is asleep? Those who succeed in awakening will be able to investigate in the akashic archives of nature.

How was the first race? In what manner did it exist? In those times, around 300 millions of years ago according to the investigations that we have carried out, the protoplasmic men existed and the Earth itself was still protoplasm.

It is not that protoplasm of Haeckel and the salty sea and thousands of other foolishness without any confirmation, no. The protoplasmic race is different.

A human race floated in the atmosphere. It had still not fallen on the humid earth. How did it reproduce and what was its origin? This race had evolved and involuted in the superior dimensions of nature and of the Cosmos. It finally crystallized on an Earth which was also protoplasmic after many evolving processes, surged forth from its original germ located in the Chaos, in the Magnus Limbus, in the Yliaster of the world. When that race crystallized, it formed the surface, the nucleus, which could just as well assume gigantic figures as well as reduce itself to a mathematical point.

On what do I base myself to affirm this? On the awakened consciousness! Have I evinced it? Yes, I have! And if you accept the doctrine of reincarnation, so much the better.

Obviously, I was reincarnated in that race and since I am awake, I cannot forget the evolving and involuting processes of the same. That is why I give testimony before you, knowing that you are asleep, but I should deposit all those data that you need in order for you to awaken.

How did that race multiply? How did they reproduce? Not as Master Blavatsky said, that they did it in an asexual manner, that they did not need sex for that. Such an affirmation is erroneous because the force of the Maha-Chohan, the creative energy of the Third Logos, flows in an overwhelming manner in everything that has been and will be. The type of reproduction was fissiparous; it expressed itself in a different sexual form, organisms divided themselves the way living cells divide. Biology students know well how the organic cell divides: the cytoplasm with a piece of nucleus becomes separated, they do not ignore that.

Ever since then, the fissiparous process remained in the blood and continues occurring in our cells by the millions. Isn't that true? Who dares to deny it? I present facts! Do you perhaps believe that that cellular process does not have a root, an origin? If you were to think so it would be absurd because there is not a cause without an effect and no effect

without a cause. Therefore, we have inherited that. From whom? From the men of the first race.

The detached organism could continue developing thanks to the fact that it continued capturing, accumulating, protoplasm from the surrounding atmosphere.

Later, the Hyperboreans surged forth of whom Friedrich Nietzsche speaks about.

People who lived in those horseshoes that surround the North Pole, country in the North. Have we evinced this? Yes or no? You have not because you are asleep. I have, because I am awake. Deny it? I do not deny it! If you consider me crazy, consider me crazy, but I have to give testimony no matter what, I have to always say the truth.

The Hyperboreans also existed; they were no longer as gelatinous as the protoplasmic men. Upon speaking in this manner, I am not referring to the cellular soul of Haeckel, in the salty sea, nor to the famous atomic moneron; that is Haeckel and his followers with their absurd theories.

Now I wish to emphatically refer to that Hyperborean race that was derived from the protoplasmic race. The Hyperboreans were a more psychic race that reproduced by sexuality in the form of budding. Have you seen the corals on the cliffs of the stormy ocean? From one coral comes out another, and from that one, another, and another. There are plants which by means of their sprouts continue multiplying themselves, the same occurred with the Hyperboreans. Certain sprouts that appeared in the Father- Mother operated the sexual force until that sprout became detached and gave rise to a new child. That was the method of reproduction of the Hyperboreans.

In the end, that race became submerged in the bottom of the stormy Pacific Ocean throughout millions of years of evolutions and involutions of this fecund Nature.

From the bottom of the seas later surged forth a gigantic continent, Lemuria, which covered the entire Pacific Ocean. It was there where for the first time, the human race rested upon the hard crust of the earth. The Lemurian continent appeared, not through spontaneous generation as Epicurus and his followers believed, nor through natural selection, the theory elevated to the category of a creating god, marvelous rhetoric that has come from the absurd, isn't that so? How did it surge forth? In what manner?

As the arboreans crystallized, their human bodies took up a hard shape. In this manner the Lemurian hermaphrodites appeared. In the same manner that they are symbolized in the gigantic sculptures of Thia, Hidalgo, Mexico. They walked upon the face of the Earth. In the beginning, they reproduced by detaching an egg cell from their organism and this egg cell developed to give origin to a new creature. That is the epoch in which the phallus and the uterus had not yet been formed, that was the epoch in which the lingam-yoni were germinating. That was the epoch in which the ovary had not yet developed.

The times elapsed in Lemuria and the reproduction system by germination appeared. Such a system caused astonishment in that epoch. The ovary received a fecundating cell, in other words, a spermatozoon, in such a manner that when that egg became detached from the ovary of a hermaphrodite, it already went previously fecundated.

Upon coming to existence, the egg opened up after a certain time of fecundation and from there came out a new child. That is why the Nahuas said: "*The Children of the third sun transformed themselves into birds*", a wise affirmation of the ancient Nahua culture.

But once the end of Lemuria came closer, in the third or fourth sub-race onwards, human beings divided into opposite sexes; cooperation was then necessary in order to create. The system of cooperation to create comes from Lemuria. It is clear that an ovarian egg fertilized by a cell is needed. It is only in this manner, in the union of a fertilizing cell with an ovum, that the original cell with the 48 chromosomes can surge forth, which we indisputably carry in our interior and in which the 48 laws of our creation are represented.

## CHAPTER VIII

### THE EX-PERSONALITY AND QUANTUM THEORY

The sparkle of the atoms is due to the packets of energy called quanta.

In the diamond, the quanta move at half their speed, decreasing their speed in a progressive manner in the air, water and earth.

An atom is like a vibrometer that produces waves with velocities of their own according to their type.

The emotional attachment of the disembodied diminishes the velocity of the quanta in such a manner that the ex-personality of the deceased can be accessible to the retina of a living person. Then, the personality of the deceased person remains palpable.

### THE GARCIA PEÑA CASE

On a certain day I found myself on the 5 de Mayo street, in Mexico City, with an old friend; I greeted him raising my arm and I continued on my way. A few days later I met a relative of my friend and, to my surprise, he told me that Mr. Garcia Peña, the one whom I had greeted, had died two months ago. Undoubtedly, this friend's ex personality, attached to this world in which we live, made itself tangible repeating the same actions that he was mechanically accustomed to.

It is indubitable that a close relationship exists between the energetic and atomic personality and the quanta which possess their own vibratory frequency. The disembodied, due to their emotional attachment to this three-dimensional world, customarily decrease the quantum vibration of their personalities in an unconscious manner, thus making themselves palpable and perceptible.

When the quanta are fast they are not perceived. When they are too slow, they are not perceived either.

Normally, the quanta travel at the velocity of light and in a circle.

The secret of time is hidden in the atom. The concept of time is negative. No one could demonstrate the velocity of time, it cannot be enclosed in a laboratory.

We, between one event and another, place the time concept; the proof is in the great number of different calendars.

What decreases the velocity of the quanta is the attitude that we have at a given instant. In spiritualistic meetings, the same phenomena of the quanta occurs.

The processes of the Cosmos is carried out in an eternal now. The rising and setting of the Sun is carried out in an eternal instant.

We should develop our own way of thinking. From the energetic point of view, each of us is a mathematical point that agrees to serve as a vehicle to specific values, whether they be positive or negative.

Image, values and identity in someone who annihilated the ego, are positive. Death ought to be considered as a mathematical subtraction.

### **REINCORPORATION**

Reincorporation is the new principle that explains the incessant incorporation of values in mathematical points.

Energy is indestructible. I do not believe that the quanta can be destroyed, but it is possible to manage to transform them. Every man who likes the psychological revolution should reflect on all that the quantum phenomena is, in order to extract from it the self-concept and the evident self-reflection of the Being.

The study of the quanta can be carried out by the one who lives mental dynamics in his own flesh and that, with it, has emancipated the mind.

### **SUPER DISCIPLINE**

The super-discipline and perfection of the physical body is achieved by means of naturopathic medicine.

When a super-discipline exists, it is obvious that we will be able to obtain direct Wisdom from the archeological documents.

By having a super-discipline we will comprehend and accept that we have to take life as a gymnasium, at will.

Great triumphs await the one who subjects himself to a super-discipline.

Those who live a super-discipline will have to be strong in order to bear the “solitude of the path”.

### **EVIDENT SELF-REFLECTION**

In order to comprehend evident self-reflection, one needs to study the Epistle of James which is for those who work in the Great Work, in the Revolution of the Dialectic.

It is necessary for the Great Work and the psychological work to be supported with faith, because faith is manifested in deeds.

The one who knows how to handle the tongue will dominate the body and will dominate others and, thereby, will be marching in an ascending manner in the Great Work and in the psychological work.

As we advance in the practice of these psychological teachings. We should avoid falling into another psychological error which is that of becoming boastful; we should also not become conceited in order to triumph in the Great Work and in evident self- reflection.

## CHAPTER IX

*Every alchemist, kabbalist and psychologist should have faith. Faith is not empirical, we have to fabricate it. It is fabricated by studying oneself and experimenting with oneself*

### THE MYSTERY

The Dharmapalas are the terrible Lords of Strength who have launched themselves against the materialistic aberrations of the Chinese communists.

I will personally be in Tibet because great things are gestated in this sacred place. I will be helping the Tibetans to put an end to the traces of abominations that the Chinese have left.

Shangri-La is in the fourth dimension and is a city in the jinn state. The Venerable Master *Kout-humi* is found there.

Tibet is very similar to Egypt and the monks do not ignore the works of mummification. In the past, the Tibetan monks carried their mummies to the volcanic craters where the lamaseries are found.

I do not have any type of fear to affirm that I am a Tibetan lama. You may ask yourselves how it is that I am here and there; this is possible by means of the Gift of Ubiquity.

Yes, momentarily I am in the valley of Adi-tattva, and at the same time, here, in Mexico. In this valley, sacred processions are carried out. The Monastery is on the right side of the valley. Before, the Monastery used to be in the third dimension. Now, it is submerged in the fourth vertical. In its interior, the building has large halls where objective works are carried out. As a 1s I have a small work room. The Dharmapalas meet in the monastery's patio.

The order is formed by 201 members. The superior staff is constituted by 72 Brahmans. This order is the one that governs the destinies of humanity.

Tibet has always been invaded by the English and Chinese, but they have always had to leave due to the terrible power of the Dharmapalas.

### THE AVATAR

Avatars cannot forget the social matter; that is why Quetzalcoatl manifested himself in two aspects: the social and the psychological.

In my case I have been concerned with these two aspects: human problems, oriented to be solved by means of the revolution of consciousness in a dialectic manner; and the problems of capital and labor, directed towards being solved by means of LACSP. (POSCLA in Spanish)

Experience:

*“They gave him a lance which represented problems, they made him enter a secret Sanctuary and he found the Patriarch St Augustine in that Sanctuary. The Patriarch took a voluminous book from the bookcase and told him: “I will teach you a mantram to make the fire blaze.” He opened the book... He lit a brazier... He pronounced the mantram “M” and the fire blazed. When he came out, he learned to sing the mantram to make the fire blaze.”*

St. Augustine, the Patriarch, returned before the Altar of the Temple, dressed with the priestly robes and Master Samael also... They placed a frying pan in their right hand... as though saying: *“You have the frying pan held by the handle!”*

They made a great chain...

*“We will accompany you forming all of this great struggle”.*

*In this manner, the White Brotherhood accompanies him...”*

*Unfortunately, the “little Gnostic brothers” have not studied, they have not lived my teaching which I have delivered during so many years to provide them with psychological liberation and they themselves have wanted to sabotage the Great Work of the White Brotherhood...*

Upon delivering the keys of Revolutionary Psychology and of LACSP (POSCLA), we do not want to climb to positions nor live from the national budget. The only thing that we want is to be useful to humanity, to serve by giving psychological norms which I myself have experienced in order for the intellectual animal to achieve Integral Revolution...

The mission of an Avatar is not only a religious matter but it also encompasses the political and psychological matters of nations.

### **THE INDIVIDUAL AND SOCIETY**

Society is the extension of the individual. If the individual is covetous, cruel, pitiless, egotistical, etc., so will society be. It is necessary to be sincere with oneself; each of us is degenerated and therefore society has to inevitably be degenerated. This cannot be resolved by the terrible monster of materialism; this can only be resolved by the individual on the basis of his Integral revolution.

The hour to reflect on our own destiny has arrived. Violence does not resolve anything. Violence can only lead us to failure. We need peace, serenity, reflection, comprehension.

The problem of the world is the problem of the individual. Bloody revolutions do not resolve anything. It is only through intelligence that we will resolve the problem of the bottling up of consciousness.

It is only by means of intelligence that we can convert the intellectual animal, first into a man, and then, into a superman. It is only with the Revolution of the Dialectic that we can overcome the terrible monster of materialism.

Human society is the extension of the individual. If we really want a radical change, if we want a better world, we need to change individually, to change within ourselves, to alter within our own individuality the abominable factors which produce misery and pain in the world. Let us remember that the mass is a sum of individuals. If each individual changes, the mass will inevitably change.

It is urgent to put an end to egotism and cultivate Christ-centrism; it is only in this manner that we can make a better world. It is indispensable to eliminate covetousness and the cruelty that each of us carries within. It is only in this manner, by each individual changing, that society will change, because the latter is merely the extension of the individual.

There is pain, there is hunger, confusion, but none of this can be eliminated through the absurd procedures of violence. Those who want to transform the world on the basis of revolutions of blood and liquor, or with *coups-d'etat* and executions by shootings are totally mistaken because violence engenders more violence and hatred, more hatred. We need peace if we want to resolve the problems of humanity.

Darkness is not dissolved with blows and with atheism, but rather by bringing the light. Neither is the error gotten rid of by fighting it face to face, but rather by disseminating the truth without having to attack the error. However much the truth advances, that much will the error have to step back. One does not have to resist what is negative, but instead practice the positive unconditionally and teach its advantages through practice. By attacking the error, we will provoke the hatred of those who err.

What we need is to disseminate the light of the Revolution of the Dialectic in order to dissipate the darkness.

It is urgent to analyze the fundamental principles of the Marxist dialectic and to demonstrate to the world the tremendous reality that these do not withstand an in- depth analysis and that they are pure cheap sophistry.

Let us make light if we want to overcome the darkness. Let us not spill blood. The hour of being comprehensive has arrived.

It is necessary to study our own 'I' if we really love our fellowmen. It is indispensable to comprehend that it is only by putting an end to the factors of egotism and cruelty that each of us carries within, that we can create a better world, a world without hunger and fear.

Society is the individual. The world is the individual. If the individual fundamentally changes, the world will inevitably change.

Consciousness is in serious danger and it is only by radically transforming ourselves as individuals, that we can save ourselves and save humanity.

### TO THE CONSCIOUSNESS

*Sleeping Consciousness...*

*How different you would be if you were to awaken...  
You would know the Seven Paths of Happiness,  
the Light of your Love would shine everywhere,  
the birds would rejoice within the mystery of your forests,  
the light of the spirit would shine, and happy,  
the elementals would sing for you in chorus.*

### ENLIGHTENMENT

In order, practice the teachings of the Revolution of the Dialectic. Begin your Integral Revolution from this moment. Dedicate time to the oneself because in this state, as alive as you are, with that tremendous I within, you are a failure.

I want you to resolve to radically die in all the levels of the mind.

Many complain that they cannot travel in the astral world at will. When one awakens consciousness, astral travel ceases to be a problem. *The asleep are not good for anything!*

In this work of the Revolution of the Dialectic, I have delivered the science that is needed to achieve the awakening of consciousness. Do not commit the error of reading this book like someone who reads a newspaper. Study it profoundly during many years, live it, take it into practice.

To those who complain of not having achieved enlightenment, I advise patience and serenity. Enlightenment comes to us when we dissolve the pluralized 'I', when we have truly died in the 49 levels of the subconscious.

Those who go around coveting occult powers, those who utilize Sex-Yoga as a pretext to seduce women, are totally mistaken and march in an opposite direction to that of the goals and disciplines that Universal Gnosticism establishes.

Work in the three factors of the revolution of consciousness in an orderly and perfect manner.

Do not commit the error of committing adultery and fornicating. Abandon being like a butterfly. Those who live like butterflies going from flower to flower, from school to school, are, in reality, sure candidates for the abyss and the second death.

Abandon self-justification and self-consideration. Become enemies of yourselves if you really want to radically die; it is only in this manner that you will achieve enlightenment.

Depart from *Radical Zero*. Abandon mystical pride, megalomania, the tendency to consider yourselves super transcended. *All of you are merely intellectual animals condemned to the pain of living.*

It becomes urgent and undelayable that you make an inventory of yourselves in order for you to know what you really are.

*Be humble in order to attain enlightenment, and after having attained it, be more humble yet.*

**Samael Aun Weor**
